

***Powerful business solutions designed
for behavioral health providers***

The information you need to succeed

In today's demanding reimbursement environment, behavioral health professionals face increasing pressure to improve outcomes, increase service delivery and reduce compliance risk.

With AnalyticsRx, you'll meet those challenges head-on – plus improve your bottom line, enhance client engagement and satisfaction, and get the tools you need to attract and retain top-flight personnel.

Sound impossible?
We'll make it easy.

"We needed new tools to excel. One year after implementation, our results are at a level way beyond our wildest expectations."

*Stephen Christian-Michaels, MA, LSW
Chief Executive Officer
Family Services of
Western Pennsylvania*

Bringing together diverse data sources for a stronger whole

Behavioral health providers have vast quantities of data contained in disparate data systems and file formats. This creates a heavy burden for IT staff to manage. AnalyticsRx is compatible with leading EHR/EMR programs and consolidates data integration processes, bringing efficiency to your digital ecosystem with a robust VJDBC direct connection.

The bottom line: lasting improvements in compliance, productivity & outcomes.

Power within your reach

AnalyticsRx is a proven business intelligence solution that empowers behavioral health organizations to make real and lasting improvements in their outcomes, productivity and compliance. It specifically addresses the challenges of today's compliance-driven market, including increasing regulatory requirements through collaborative documentation, compliance alerts and authorization dashboards.

AnalyticsRx works with your existing data infrastructure and is fully compatible with leading Electronic Health Record (EHR) programs. It seamlessly mines data from your various information systems into a HIPAA-compliant cloud solution that summarizes your organization's performance in real time.

* Analytics Rx Customer Benchmarks

AnalyticsRx lets you visually connect with all of your data sources in real time.

The bottom line: for precise intelligence of mission-critical KPIs.

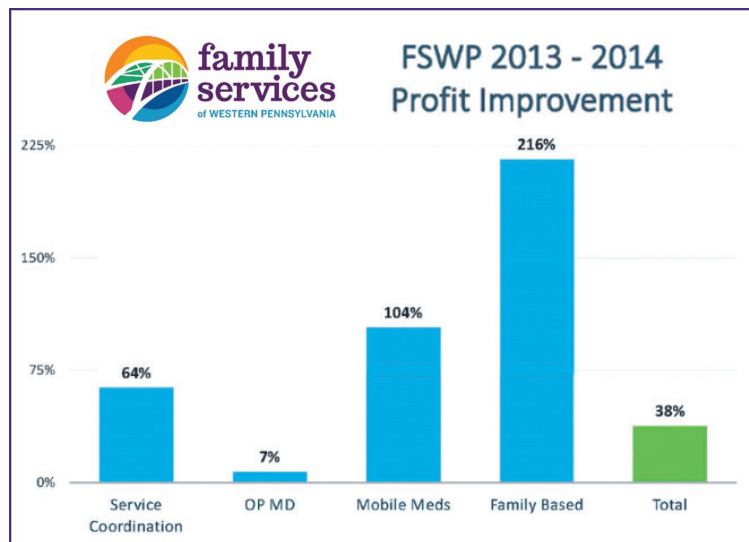

Analytics made easy

AnalyticsRx offers the benefits of proven behavioral health intelligence without the high cost and lengthy development cycle of other analytics solutions. Once implemented, the cloud-based system goes to work immediately, automatically compiling up-to-the-minute data that you can access with minimal time and effort.

You'll quickly identify ways to improve outcomes, engage clients, increase service delivery, and empower and reward your employee team.

"The tools give managers the ability to very quickly understand performance on a number of different levels: financial, qualitative, engagement and compliance. It allows them to incentivize individuals and teams, by measuring their daily performance against their goals."

*Trish Rosenstein
Senior Vice President,
Administrative Services
Journey Health System*

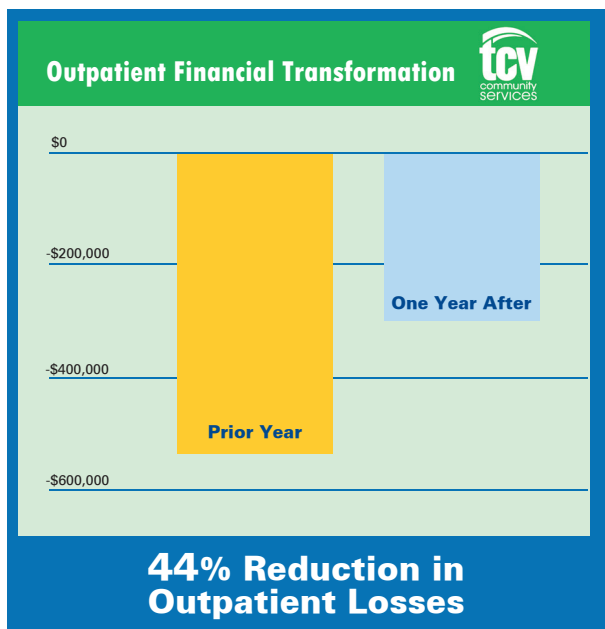

The program generates a variety of clean, easy-to-understand dashboards and scorecards that can be used with personnel at all levels, to communicate progress and target areas for improvement.

The bottom line: realize improvements within weeks, not years.

Guidance that gets you there

AnalyticsRx isn't a canned program. Nor is it long-distance consulting with minimal on-site presence. We're here to help, every step of the way.

We work with you to identify the key performance indicators that will most quickly and directly contribute to your success, and customize the program to the business practices of your organization. The goals developed at the macro perspective are then drilled down to the micro level, with each individual's job duties and priorities tied back to how best to achieve those goals.

"We experienced a 44% reduction in outpatient losses in the first year of applying AnalyticsRx's best practices."

*Frances Sheedy Bost
Chief Executive Officer
TCV Community Services*

The bottom line: it's about working **smarter**, not harder.

"Our staff works hard to meet the needs of the customer. This tool gives them the information they need to make use of their time to better meet the needs of their customers."

*Ken Wood
Chief Operating Officer
Milestone*

Rewarding for everyone

With AnalyticsRx, everyone benefits. By working smarter, clinicians and staff have more time to focus on the areas that matter most. Clients become increasingly engaged, resulting in improved satisfaction and outcomes. The organization benefits by reducing compliance cost and risk, streamlining processes and building organizational capacity. Above all, quality of care is enhanced.

Developed with and for leaders in the behavioral health field

AnalyticsRx has worked in parallel with leading behavioral health organizations to develop and refine this proprietary technology to meet the requirements of your industry. This powerful business analytics program was designed specifically for behavioral health applications, and has been proven throughout a wide range of organizations:

The bottom line: building relationships between datasets & people.

Securing grant funding

AnalyticsRx has secured nearly \$1 million in grants to help underwrite behavioral health organizations' investments by documenting the benefits and bundling our proven business analytic solutions, program assessments and provider capital investments.

Benchmark ROI

Ask about our other software solutions:

"Out of the gate, AnalyticsRx assessed our processes and validated what we'd surmised about our performance in terms of productivity and its link to revenue. Their proposal outlined in detail the areas where we could achieve the greatest impact."

*Trish Rosenstein
Senior Vice President,
Administrative Services
Journey Health System*

Building relationships

An expert in productivity and efficiency – with a long-career in consulting – develops a product that will lift the daunting burden placed on behavioral health providers.

Steve Blaney has spent more than 35 years developing relationships with all sizes of for-and non-profit organizations. It was from these thousands of interactions and from collaborative input that he and his team developed AnalyticsRx. After all, it's the relationship of datasets and their workflow integration that are the heart of this powerful software solution.

AnalyticsRx works with your existing data infrastructure and is compatible with leading EHR/EMR programs to mine data into a HIPAA-compliant cloud analytic solution. It allows you to make real-time decisions and lasting improvements in compliance, productivity and outcomes. AnalyticsRx is now a suite of products that includes Outcome Evaluator and Performance Manager.

The business of behavioral health is built on relationships – most of them life-changing and life-saving. Take advantage of the power of AnalyticsRx to manage and strengthen these valuable relationships and your bottom line.
